Numerous	Possible ASTRO (S/P)
5. LENGTH OF OBSERVATION	11. BRIEF SUMMARY AND ANALYSIS
Varied	Observers have watched many objects in the sky that appeared like stars. The objects are flashing red, green, and white in color. The observers have observed many objects on several sights in a row.
6. TYPE OF OBSERVATION	The one main witness appears to be unreliable. She is the one who is actually reporting the observations. She even reported that the objects were like stars.
Ground Visual	The description is consistent with that of an astronomical observation.

They are Mr. & Mrs. [REDACTED]  
their address is [REDACTED]  
He is [REDACTED] the Franklin Fire Dept.  
Now we have about 3 1/2 acres & the Warwicks  
have about same amount - When we stood  
by their back door we could see the star  
perfectly & it flashed Red & Green with white  
I believe on & off & it flickered but it was  
very bright & we could see it alternate red then  
green as if it went around. The Warwicks had  
guests & one came out and saw it with us.  
We stayed there the longest time and I came  
home & called The Franklin Police but they never  
came I don't think because I didn't see them.  
We left it there & Mrs. [REDACTED] commented  
that it looked like it was coming down.

Page - 5

So I went out there again to check it out & it  
was still there so I called him & we all  
3 went to take a look. The result we  
spent the rest of the evening in his room  
which ~~had been~~ until about 11:30 or so  
hatching that one & we saw others & they  
were very active shooting across trees. The  
position I was in I didn't see them just but  
they did until they reached the tops of the  
trees then I saw it. There were 3 I believe  
all told that evening in the front. -

At about 11:30 we all went to bed & left  
them up there. At 2 o'clock I woke up  
and I believe was a rather unusual mom.  
I looked up to see if the stars were there -

Page 6-

I saw the one out higher, still grass where  
the moon I will explain at a later time.

As I can tell you it was very bright - and it  
changed shape between 2° dark + perhaps  $\frac{1}{2}$  hr to  
 $\frac{3}{4}$  hr when I returned back to bed. From a  
whole full moon to a  $\frac{1}{4}$  moon but it was  
 $\frac{1}{4}$  on the bottom - This may be normal - I don't  
know but I do know I've never seen a moon  
like it. and I'm 49  $\frac{3}{4}$  yrs old. Most moons  
I've looked at where were not so hard to look at.

I was almost blinded by its light. In fact  
this noticed my eyes has been bothering me from  
looking at all these phenomenal things in  
the sky. This moon was not smooth round like  
my other moons I have seen. It was jagged and

the edges - At morn as this - I don't know  
then it looked not like a moon but a hanging  
ball full of clusters of stars & it twinkled  
like Rhinestones (morn). That's like diamond -  
Every when it became compressed to a quarter  
morn - it had longer of strong light then I -  
found it was hard to look at then I couldnt  
really tell you any better what I saw - if  
I see more morn like this one then I don't  
know it is normal for morn & look like this  
but if I do it then I know this morn was  
not the normal morn that you see all the  
time -

One more thing -

I was a real bright morn - It lit  
up the area in my bedroom where my bed is.

Page 8

Because the moon too was across Broadcliff  
& was shining in my bedroom which is at the  
front of the house - it is the master bedroom  
& it has 2 large windows - plus a dressing room  
facing the back of the house. My bed was in front  
of the window & it lit up that area but  
still there were no shadows on the ground as  
it always does with a bright moon. Because  
I love to watch the shadows on the ground I  
noticed there were not any - the ground was  
dark but my window was lit up - all  
in front of it. I called the telephone operator &  
asked if there was a moon the night as when  
we went to bed, there was no moon as far as  
anyone could recall. - So the operator couldn't know  
the switch board's got the window so she couldn't tell me.

We can separate planes with white light and red lights as some went by.  
We could hear motors from planes.  
When they passed the noise was gone too.

"UFO" Reporting Data (continued)

c. MANNER OF OBSERVATION:

(1) Use one or any combination of the following items: Ground-visual, air-visual, ground-electronic, air-electronic. (If electronic, specify type of radar.)

Ground Visual

(2) Statement as to optical aids (telescopes, binoculars, etc.) used and description thereof.

We sure wish we had telescopes, binoculars = it would help.

(3) If the sighting occurred while air-borne, give type of aircraft, identification number, altitude, heading, speed, and home station.

d. TIME AND DATE OF SIGHTING:

(1) Zulu time-date group of sighting around 8 p.m.

(2) Light conditions. (Use one of the following terms: night, day, dawn, dusk.)

Night

e. LOCATION OF OBSERVER(s). Give exact latitude and longitude of each observer, and/or geographical position.

f. IDENTIFYING INFORMATION ON OBSERVER(s):

(1) Civilian - Name, age, mailing address, occupation, and estimate of reliability.

Mrs. Ed ██████████ 49-3/4 years old, son ██████████ 22 years old, neighbors ██████████ and their 25 year old son ██████████ ██████████. Another friend I do not have her name was visiting the ██████████ at the time.

(2) Military - Name, grade, organization, duty and estimate of reliability.

"UFO" Reporting Data:

a. DESCRIPTION OF THE OBJECT(S):

(1) Shape Stars and the Moon

(2) Size compared to a known object (use one of the following terms: Head of a pin, pea, dime, nickel, quarter, half dollar, silver dollar, baseball, grapefruit, or basketball) held in the hand at about arm's length.

Size Good size (1) star (I'm not any good on size)

(3) Color Red & Green (Green \* White - 1 all green (large))  
some small all green

(4) Number All told - I'd say 25 or so, but they come & go - you cannot  
count them all.

(5) Formation, if more than one They are all around everywhere here.

(6) Any discernible features or details Moon Very Bright-changed shape  
Sun. Oct 9, 66.

(7) Tail, trail, or exhaust, including size of same compared to size  
of object(s)

(8) Sound; if heard, describe sound No Sound

(9) Other pertinent or unusual features Some stand still, others go

up and down - some shoot across other tree tops, or out in the sky.

b. DESCRIPTION OF COURSE OF OBJECT(S):

(1) What first called the attention of observer(s) to the object(s)?

1 Green red star - by son [redacted] age 12, at about 8 p.m. or so

(2) Angle or elevation and azimuth of object(s) when first observed.

Up in the sky

(3) Angle or elevation and azimuth of object(s) upon disappearance.

It seemed to be coming down when we left it there & came home.

(4) Description of flight path and maneuvers of object(s).

Name it and they have done it.

(5) How did the object(s) disappear? Instantaneously to the North,  
etc.)?

Some disappear and re-appear

(6) How long were the objects(s) visible? (Be specific, 5 minutes,  
1 Hour, etc. Some are here all night in some spot, or at least I check them  
out as far as about 4 a.m.)

SUBJECT: UFO Sighting

TO: AFSC (FTD) Wright-Patterson AFB, Ohio 45433

1. The attached correspondence was not forwarded previously because we did not regard the witness as reliable.
2. However, she has telephoned us many times in the past few weeks, and has threatened to write to the President of the United States if we do not "take action."
3. We therefore felt that her letters should be brought to your attention. We feel you have dealt with matters of this nature in the past and could probably advise us on what steps to take, if any, in a case like this.

Oct 12 - Wed - Tom & I watch moving  
white & green stars -

Oct 13 Thurs - Cloudy evening  
faintly visible moving stars  
Moon on mirror on wall reflecting  
a window about half way around 2° lat  
Never saw this before.

No moon outside because I looked out &  
got up - as I woke up just then &  
opened the draperies. No moon again  
outside when I looked out of both windows  
But moon still on the mirror on the wall  
now. 1 green star not alternating  
visible on the ground across street  
at some time.

Oct 14 -  
Letter to you - If this keeps  
up I will be writing a book before I  
get some help from anyone.

Oct 14 1966

Gentlemen:

Friday

I am enclosing my first letter  
that started last night but as I  
have to rewrite it I will be to long at  
it because I'm real (red) tired &  
can't keep up - my 12 yr old son has been  
in bed sick along with the all happening.  
So if you can't make it out real well I  
will correct it perhaps later on. I will  
give the dates of these unusual occurrences.

Oct 8 Sat 1966 - First night

Oct 9 Sun 2° clock in morning Morn

Oct 9 Sun night Cloudy & rain here I don't

Oct 10 Monday Cloudy rewrite velocity.

Oct 11 Tues - 6 stars around my house  
Stationary green & white light

If you wait to long perhaps I will get  
confused, at so many things happening I  
will I not be able to give them in the  
right rotation - Since I'm almost seeing  
it every night then to difficult to keep track  
of and I perhaps will not try to keep up  
with it if I am too tired. This is  
the best I can even right at the moment.  
Since my health is not very good I  
couldnt stand any harassment on my  
family. I will do the best I can for the  
orderliness when working under for each day.

Sincerely Yours  
Mrs. [REDACTED]  
[REDACTED] Dayton.

Fridy-

Please keep it confidential until  
it is all checked out. I believe I'm not  
here to ask you for an explanation.

I believe I'm here to give you one.

This is not the first phenomenon in  
my life - The first occurred 33  $\frac{1}{2}$  yrs ago  
& I've not discussed it very much with  
any one because of experience of telling it  
& seeing incredible disbelief on people's faces.  
This can be checked out as I told it  
somewhere when I believe it will help  
explain it.

So you can see by this this is not  
something I planned for my self or by  
my self.

Sat night Oct 8 - about 8 o'clock or  
just when it was getting dark my son <sup>age 12</sup> Tom  
was out doors playing with our 2 pups outside  
the back door in the back yard. He was as  
he said about to come in when he saw this  
special looking Star - He called me out &  
I saw it - it was across my back yard &  
the whole of my neighbors property and across  
the street a so from there. So Tom & I  
followed it and we called on the phone  
these neighbors to come & see what they  
did.

Oct 13-1966

Gentlemen:

I am not telling you now ✓  
because I don't know East from West -  
North from South - that's the truth -

I am not a star gazer only I'm aware  
that most stars have been on the whole  
rather just up there and I never  
questioned it beyond that. I am not  
a moon gazer only that I know moonlight  
on the ground and I love to look out at  
night & see it on the ground & see  
the shadow everywhere. The beauty of it all.  
The lady in your office told me just to  
write a letter telling it as best as I can.

Page 4 -

As we went back out front we noticed another  
to the side of our property doing some only it  
was green & white alternating lights. [REDACTED]  
was feeling well & he was scared so I brought  
him in to calm him down but every so often  
he ran to to check on the one that was green & white.  
it then moved and crossed the street to where  
it ~~had~~ remained all night. This is across  
Bear cliff facing our house. - about 9 o'clock  
or so my older son Jim came home - he 25 yrs  
old & we told him about our evening. He just us  
down - He thought we had faked or something -  
any way he would going to accept our story -  
So he went into his room to watch Television -
